## 4" FITTER PAINTED SHADES

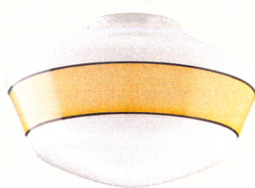

OUR FAMILY OF ART DECO-ERA PAINTED SHADES (here and on pages 44 and 50) evoke the color and playful spirit of the 1920s and '30s. Offered in Green and Tan and a range of coordinating sizes, these shades add period fun to kitchens, bathrooms, and any room with a less formal look. Note that the hand-painted colors vary, and look different lit and unlit.

## REJUVENATION CUSTOMERS

### THE SCHNEIDER/CLEMENTS FAMILY

Like many of our repeat customers in the trade, Joe Schneider and Kim Clements of JAS Design/Build in Seattle make their living remodeling period kitchens. So the kitchen in their own 1905 bungalow must be a coffee-table book example of stunning good taste and meticulous craftsmanship, right? "Well," says Kim, "we'll let you know when it's finished. We've only been working on it for six years..." What explains the snail's pace for these restoration professionals? Perhaps demanding clients and schedules keep them focused on the homes of others. Or maybe they've been distracted by side projects, like their three "additions" since moving in: Finn (5), Balloch (3), and Harper (1). Or it could be that once they hung up our Jefferson schoolhouse fixtures a couple of years ago, their kitchen just looked good enough – even without trim and paint.
